PROFESSIONAL SUMMARY

Senior Software Quality Assurance Engineer with 6+ years of experience in manual and automation testing of web, mobile, desktop, and API-driven applications. Skilled in Playwright, Cypress, Katalon Studio, Postman, Bruno, JMeter, SQL, Git, GitHub, and Agile methodologies. Proven track record of building scalable automation frameworks, reducing regression testing cycles by up to 40%, increasing test coverage by 25%, and delivering high-quality software products in fast-paced Agile environments. Experienced in API automation, performance testing, defect management, and quality assurance process improvement.

CORE SKILLS

Automation Testing	Playwright (POM), Cypress, Katalon Studio
API Testing	Postman, Bruno, Swagger
Performance Testing	JMeter
Security Testing	Burp Suite
Database Testing	SQL (MySQL)
Virtualization:	Virtual Machines (VMs)
Test Management	JIRA, TestRail, Linear
Methodologies	Agile, Scrum, STLC, SDLC
Other Skills	Cross-browser Testing, Responsive Testing, CI/CD Fundamentals
Version Control	Git, GitHub

PROFESSIONAL EXPERIENCE

Senior Software Quality Assurance Engineer

Conovo Technologies | Dec 2022 – Present

- Designed and executed comprehensive test plans, test cases, and test scenarios for multiple web and mobile applications, ensuring complete requirement coverage.
- Architected and developed a Playwright automation framework from scratch, implementing Page Object Model (POM), reusable components, reporting, and data-driven testing to improve test efficiency and maintainability.
- Managed automation test scripts using GitHub version control and collaborated on code reviews with development teams.
- Implemented automated test execution within CI/CD workflows to support continuous quality assurance.
- Validated APIs using Postman and Bruno, ensuring accurate data exchange, authentication compliance, and reliable system integrations.

- Decreased regression testing effort by 30–40% through automation implementation.
- Conducted cross-browser and responsive testing across multiple browsers and devices.
- Performed functional, regression, smoke, sanity, integration, system, exploratory, and UAT testing across 90+ releases, contributing to stable production deployments.
- Collaborated closely with developers, product owners, and stakeholders to clarify requirements and reduce defect leakage across 90+ production releases.
- Actively participated in Agile ceremonies including sprint planning, backlog grooming, daily stand-ups, sprint reviews, and retrospectives.
- Mentored junior QA engineers on testing methodologies, automation practices, defect management, and quality assurance best practices.
- Increased test coverage by ~25% through automation and optimized test design.

Software Quality Assurance Engineer

Devigital Systems | Sep 2019 – Nov 2022

- Performed **end-to-end testing** for web, mobile, and desktop applications.
- Built and maintained automation scripts using **Katalon Studio**.
- Conducted **API testing using Postman collections**, validating status codes and response structures.
- Conducted performance testing using JMeter to identify system bottlenecks and support application performance improvements.
- Managed defects and workflows using **JIRA, Asana, and Trello**.
- Developed detailed QA documentation, including test plans, cases, and scenarios.

KEY ACHIEVEMENTS

- Established a scalable Playwright automation framework from scratch using Page Object Model architecture, improving test reliability and accelerating release validation cycles.
- Shifted defect detection left by embedding QA into requirement reviews, resulting in fewer post-release hotfixes and reduced rework effort.
- Increased overall test coverage by 25% through strategic automation initiatives and optimized test case design, reducing defect leakage and improving release quality.
- Logged, tracked, and drove resolution of 300+ defects across multiple product cycles using JIRA and TestRail, maintaining full traceability from discovery to sign-off.
-

CERTIFICATIONS

Huawei HCIA-AI Certification Huawei | Issued: 2023

Covered machine learning lifecycle, neural networks, Python for AI, and cloud AI deployment using Huawei ModelArts.

EDUCATION

Bachelor of Science (BS) in Computer Science

University of Agriculture, Faisalabad
